WELCOME MESSAGE / INVITATION

Dear Colleagues, with the emergence and resurgence of infectious disease, infection control is imperative for the prevention of infections in the hospital and the community. In 2004 the Hong Kong Infection Control Nurses' Association (HKICNA) has hosted the first international conference in Hong Kong. The conference was very well attended. At the request of many of our members, we will host the 2nd international conference in 2006. This will be held on 16th to 18th June 2006. The theme of this conference is "Evidence Versus Reality". We have invited renowned speakers locally and from the overseas to review with us the latest evidence and cutting edge information on infection control. Local researchers would be presenting their research work with indigenous essence. You are cordially invited to share your valuable experiences with us. Our conference manager has also organized some lovely social events and hope that all of you will have an enjoyable experience with us in Hong Kong.
